-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-17 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-17 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 1763

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wu (6,045,671) alone or in view of Corderman (6,491,967). Wu discloses an apparatus for fabricating a plurality of different combinatorial materials for analysis, comprising a plurality of separately controllable material sources. The material sources are arranged such that they can be activated individually and separately in a sequence, or clusters of sources can be activated simultaneously. Also, the sources can be used in a process in which they are activated both simultaneously and sequentially (col. 27, line 39, to col. 28, line 14, for example). Wu also teaches (col. 23, lines 7-12 and col. 25, lines 23-31) that plural sputter guns can be used as the material sources. The sputter guns are plasma sources. It would have been obvious to one skilled in the art to provide a plurality of plasma sputter gun material sources for both simultaneous use as a cluster and also for use sequentially and separately in view of the teachings of Wu. Wu (col. 28, lines 9-14) also teaches that a variety of spray guns can be used as the material sources. Also, Cordeman teaches that plasma spray guns can be used for combinatorial coating processes. It would have been obvious to use plasma spray guns of the type taught by Cordeman as the spray gun material sources of Wu because

Art Unit: 1763

Cordeman teaches that this type of spray gun can be used for combinatorial coating processes of the type taught by Wu.

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wang (6,364,956) in view of Wu (6,045,671) or Corderman (6,491,967). Wang (Fig. 3) discloses an apparatus for fabricating a plurality of different combinatorial materials for analysis, comprising a plurality of separately controllable material sources. The material sources are arranged such that they can be activated individually in sequence, or clusters of sources can be activated simultaneously. Also, the sources can be used in a process in which they are activated both simultaneously and sequentially. Wang also teaches (col. 5, lines 47-59 and col. 6, lines 4-14) that the material sources can be sputter sources or spray sources. Therefore, it would have been obvious to use plasma gun sources such as the sputter gun of Wu or the plasma spray gun of Cordeman as the material sources in Wang's apparatus.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard Bueker whose telephone number is (571) 272-1431. The examiner can normally be reached on 9 AM - 5:30 PM, Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Parviz Hassanzadeh can be reached on (571) 272-1435. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 1763

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
